

Please add the following claims:

Claim 11. (New) The laminated film according to Claim 1, wherein the resin layer (A) has a thickness of from 30 to 700 μ m.

A² Claim 12. (New) The laminated film according to Claim 3, wherein the transparent layer has a thickness of from 10 to 300 μ m and the colored layer has a thickness of from 20 to 400 μ m.

Claim 13. (New) The laminated film according to Claim 1, wherein the resin composition contains 20 to 70% by weight of the propylene polymer.

Claim 14. (New) The laminated film according to Claim 1, wherein the resin composition contains 10 to 50% by weight of the inorganic filler.

Claim 15. (New) The laminated film according to Claim 1, wherein the resin composition contains 10 to 50% by weight of the thermoplastic elastomer.

Claim 16. (New) The process according to Claim 8, wherein the resin layer (A) has a thickness of from 30 to 700 μ m.

Claim 17. (New) The process according to Claim 8, wherein the resin composition contains 20 to 70% by weight of the propylene polymer.

*A2
could*
Claim 18. (New) The process according to Claim 8, wherein the resin composition contains 10 to 50% by weight of the inorganic filler.

Claim 19. (New) The process according to Claim 8, wherein the resin composition contains 10 to 50% by weight of the thermoplastic elastomer.
